WHAT TO EXPECT UPON YOUR ARRIVAL

If you are traveling to St. John Vianney Center by airplane, we will arrange for a limousine service to be available to meet you at the airport upon your arrival. You will need to call St. John Vianney Center early with your travel arrangements.

If you are arriving by car, enter the first driveway on Woodbine Road and come to the main doors of the administration building. The receptionist will call for one of our staff nurses.

The nurse will escort you to your room and help you with your belongings. As a treatment center, you will be asked if you have certain items that we consider to be a safety matter and they will need to be kept at the nurse's station for your use. These items include: matches and lighters, pocket knives, loose razor blades and straight edge razors, medications including non-prescription items, your car keys, and other such items. Any electrical items (radio, clock, etc.) will also need to be given to the nurse for inspection by our maintenance department. This is to ensure the safe operation of the electrical item. They will be returned to you as soon as they are inspected.

As part of the time with the nurse, you will be asked to sign the Consent to Treatment form, a standard in health care. This will later be reviewed in greater detail with your admitting psychiatrist.

In order to assist you in your general orientation to the Center and to the unit, a resident "buddy" will be assigned to you and you will be given a Resident Handbook. Please review the handbook carefully and feel free to ask any questions concerning the information that you read. You will also be given a tour of the facility.

Within the first 24 hours of your arrival, you will undergo a number of assessments with your Treatment Team.

A representative from the Medical Records Department will verify demographic information and make copies of your insurance cards.

Additional information will be given to you at the time of your arrival, including a schedule of meetings.
