You formed my inmost being; you knit me in
my mother's womb. I praise you, because I am
wonderfully made; wonderful are your works!
My very self you know.

PSALM 139:13-14

Nursing and Medical Services focuses on “healing the body” in our care model.

Through compassionate and empathetic attentiveness, our nursing staff serve as a conduit for healing between the mind, body, and spirit. It is our privilege to serve our residents 24/7/365, attending to their needs, both big and small. There are many opportunities for nursing to connect with our residents in a hands-on way through encouraging words, supportive listening, and caring presence.

Medical Services are under the direction of an internal medicine physician. The physician meets with each resident at the time of admission and periodically throughout the residential program. Our caring physicians use a holistic approach to medicine, thoroughly reviewing medical history, medications, and the resident’s plan for wellness. The goals of physical health and wellness are evidenced by use of consultative services for complex disease process or new diagnoses, as well as rehabilitative therapy and nutrition.

In tandem, Nursing and Medical Services provide caring, compassionate attention to the healing of the body and restoration of wellness.

Resident Care from the Nursing and Medical Staff

- The Nursing and medical staff are part of the interdisciplinary treatment team working with psychiatry, psychology, spiritual care, and continuing care
- Comprehensive Physical Assessment: including physical examination, laboratory and diagnostic studies, and consultation to specialists as needed
- Medical management: including review of medications, and support from contracted pharmacy for on-site administration
- Education provided for acute and chronic disease conditions
- Rehabilitative services: including physical therapy, occupational therapy, and speech therapy
- Nutrition services through registered dietician for prevention and management of chronic diseases
- Support for activities of daily living and personal care by nursing support staff
